# Job Description

# Performance Testing -CON - Hyd|Blr|Mum- E22HCCONRP-PT

## Description

**Performance Testing - Consultant**

**A senior software tester will be expected to support software development through designing and executing the various software quality processes. The practitioner's responsibility is to handle end to end functional modules, assist in status reporting and effectively communicate test execution defects/issues. The role requires technical skills to perform manual, automation and performance testing.**

**Who we are:**

**Core Business Operations (CBO) is an integrated set of offerings that addresses our clients' core business issues. CBO provides a gamut of consulting services spanning advisory, implementation and operations. CBO practitioners help our clients transform, modernize, and run their existing technology platforms right from process design to implementation and finally ensuring roll-out transition.**

**CBO has four different offerings — Application Modernization Innovation (AMI) delivers end-to-end technology and application solutions to enable and improve our clients' core business operations. We do this in a truly modern way leveraging the best of innovative technology, people, and delivery approaches to help you dream, explore, and build your future. Cloud Engineering focused on end-to-end cloud services from migration strategy into transformation and cloud operations; Core Industry solutions focused on industry vertical, sector specific solutions that drive operational change and automate the core of the business; and Operations Transformation focused on creating a flexible, innovative business model for clients supported by a strong operations foundation. CBO serves clients across Life Sciences and Health Care, Government & Public Services and Financial Services among other industries.**

**Quality Engineering is talent group part of AMI which focuses on Delivering automation-led high-quality and cost-efficient testing services to measure and maximize systems and application quality.**

**We know you have:**

**Required to have-**

- **Bachelor's Degree**

- **Overall 3-6 years of relevant industry experience in Performance Testing tools like MicroFocus LoadRunner/Performance Center, JMeter, VSTS, Neoload, WebLOAD and/or any performance SaaS**

Loadrunner, Performance Center, JMeter, TOSI, RedLine, WebLOAD and/or any performance Saas **tools like BlazeMeter etc**

- At least 1-2 years of experience in some of the APM and Monitoring tools: Splunk/App Dynamics/Dynatrace/New relic or other open source tools etc

- Strong in Object-oriented design, data structures and design patterns

- Good problem solving and ability to develop optimal algorithms

- Hands-on experience in writing and executing performance test scenarios for complex systems

- Hands-on experience with performance test simulations, performance analysis, performance tuning, performance monitoring in a n-tier environment

- Perform analysis of performance issues in Pre-production and/or Production environments in cloud and/or on-premise environments

- Hands- on experience in analyzing the performance results and report the findings

- Keen eye for performance, security and scalability aspects of the application

- Demonstrated ability to capture key metrics, create accurate status reports and effectively communicate to the leadership teams and shake holders

- Hands-on experience in defect logging, tracking and verifying defects

- Study the development scope and identify components that need updates / rework

- Knowledge of any of database systems like SQL Server 2k5/2k8, Oracle and db2, etc.

- Excellent verbal and written communication skills

### Preferred:

- ISTQB/CSTE/ Performance Testing Certifications

- Experience in working with agile setup

- Experience working in onsite/offshore model

- Working knowledge of test management tools like  ALM/ Bugzilla / Jira /Visual Studio Test Manager etc

### We believe you are:

- An innovator with intellectual curiosity and creativity

- Adaptable, flexible and a professional with integrity

- A good communicator with excellent verbal and written communication skills

- Problem solver with detailed analytical and judgmental skills

- An enthusiastic person in sharing knowledge with team members and
